

That's a Plant!

(to the tune of *The Adams Family*)

A plant gets started
When a seed and bud are parted
That's why it all gets charted
How you make a plant

Root to stem (snap, snap)

Stem to leaf (snap, snap)

Bud to flower, seed to soil, that's a plant (snap, snap)

Roots go down deep
From soil water creeps
Up the stem so steep
So a plant can drink

Root to stem (snap, snap)

Stem to leaf (snap, snap)

Bud to flower, seed to soil, that's a plant (snap, snap)

Leaves are sure to grow
Photosynthesis you know
To make the food so
Every plant can live

Root to stem (snap, snap)

Stem to leaf (snap, snap)

Bud to flower, seed to soil, that's a plant (snap, snap)

Flowers are so pretty
With seeds so itty-bitty
To pick them is a pity
Because plants love to grow

Root to stem (snap, snap)

Stem to leaf (snap, snap)

Bud to flower, seed to soil, that's a plant (snap, snap)
